feelfree[®] GEAR

TECHNOLOGY

HDW Technology Fabric

Durable, 100% waterproof and easy to clean, all Feelfree Gear bags are made from a unique heavy duty yet super soft fabric that's impregnated with our proprietary PVC coating.

Completely waterproof and with a soft wipe clean surface, it's also strong, hard wearing and highly abrasion resistant compared to other waterproof fabrics.

Perfect for protecting your gear when taking on any adventure or lifestyle.

High Frequency Welding Seam Construction

For seams that are at least as strong and as waterproof as our HDW Fabric – you simply have to use High Frequency Welding technology. For seams that are at least as strong and as waterproof as our HDW Fabric – you simply have to use High Frequency Welding technology.

Waterproof Level and Guidelines.

Don't let wet gear spoil a great day.

N – Not Waterproof

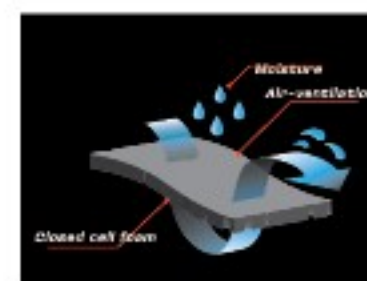

Level 1 – Material is totally waterproof but seams or zips may leak if subjected to prolonged exposure to water or high water pressure. Not suitable for accidental submersion. Ideal for heavy duty weatherproof travel luggage.

Level 2 – Quick submersion proof. Completely waterproof material and High Frequency Welded Seams with our Tri Fold dry closure. Short term protection from ingress of water if accidentally submerged. Ideal for any activity where you don't intend to get your kit wet but there's a high chance it could happen.

Level 3 – Submersion proof.

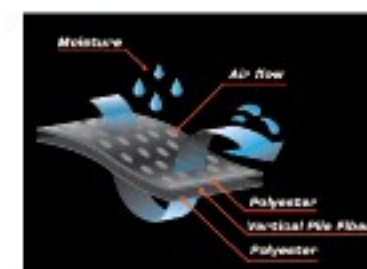

CLOSED CELL FOAM

We use closed cell foam in our padded back pack straps and back panels. Closed cell foam is strong and offers long lasting comfort due to minimal distortion or compression. It also resists the absorption of water so drains and dries quickly – perfect on our gear that's designed to protect your gear from wet weather or water based activity. Found on Dry Tanks, Track, Metro and Roadster back packs straps and pads as well as Cruiser detachable shoulder straps.

3D AIR MESH

Incorporated onto the contact points of our shoulder straps and back pads, 3D Air Mesh creates air flow between the back pack and wearer to further aid comfort and breathability. Found on Dry Tanks, Track, Metro and Roadster back packs straps and pads as well as Cruiser back padding and detachable shoulder straps.

DETACHABLE WAIST BELT

Great to help stabilize your pack when carrying heavy loads or during high action activities. But when they get in the way when your just hauling your laptop to work, just take them off and store them in your bag. They can also dual as emergency tie downs to secure your bag into a raft or onto your motorbike rack. Found on Dry Tanks, Track, Metro, Roadster and Cruiser 72 and 90.

REMOVABLE TECH SLEEVE

This great feature turns your pack into a waterproof and shock resistant tech pack. Our padded Tech Sleeve will take your laptop, tablet, smart phone, pens and other essentials and locate them securely in the back of your back. Fits up to 15.6 inch laptops. Found on Metro and Roaster series back packs.

THE FEELFREE WARRANTY

Feelfree Gear warrant all products against defects in materials and workmanship for 2 years from the date of retail purchase. Feelfree Gear reserve the right to repair or replace any warranted product at their discretion. Please note that wear or tear and any consequential loss is not covered by warranty. If you have a warranty issue, please contact the Feelfree Gear dealer from where you originally purchased your Feelfree Gear product for assistance. Please supply date and proof of purchase, and photos of issue for speedy service.

Founded on fun

New Zealanders crave adventure. Adrenaline-fuelled activities are part of the Kiwi culture, along with the unnerving love of travel and exploration, both on land and on water.

This love of the great outdoors led to the creation of the Feelfree brand in New Zealand in the late 1990s. And, a new generation of high performance kayaks became the first products to bear the Feelfree name.

With the country also being one of the rainiest places on earth, we also understood the importance of keeping valuables dry both in and out of the water. So Feelfree Gear soon followed: fashionable, fun and functional waterproof bags that stay true to the Kiwi sense of adventure.

Functionality takes over

If you think New Zealand's wet, Thailand is in a different league. Monsoon season lasts from May to November. And if anybody knows how to keep stuff dry, it's the Thais. So our base in Bangkok is the perfect place for Feelfree Gear to be tested and manufactured.

Thailand has a rich manufacturing history and the Buddhist way of life is one of morals and wisdom. This shows in the quality of our bags, which are made to the highest international standards using a uniquely soft-yet-tough tarp. Learn the science behind our bags.

It's this blend of Kiwi adventure and exploration and Thai craftsmanship, high quality manufacturing and knack of keeping things dry that sets Feelfree Gear apart from every other brand on the market. Where others offer a handful of waterproof bags as part of a wider catalogue, we focus on nothing else. And we're proud to be the experts.

A global lifestyle brand

Our range of cool designs and vivid colours - including our super-stylish Voyager Collection Tote Bags, and Dry Gear Range - were originally designed for wet weather and extreme water sports enthusiasts, but are now also a huge hit with marine, sail sports, hiking, cycling, snow sports and adventure travel fans as well as being ideal for day-to-day use where wet gear could ruin a great day.

And what began life as waterproof gear have now blossomed into the go-to bags for fashion, fun and function in any climate.

feelfree
GEAR

Detail

Looking for the ultimate fully featured 'Messenger' style bag that's also submersion proof? Then look no further than Feelfree Gear's Freerunner EX. On the inside, our padded and removable Techsleeve keeps your Laptop or Tablet safe and secure whilst also providing storage space for passport, wallet, documents, chargers and anything else you need to keep safe and to hand. An additional internal mesh multi-pocket and an external weatherproof pocket provide more useful storage solutions.

You'll find a number of clever carry options on the outside of Freerunner EX. Our adjustable cross body shoulder strap includes a comfortable shoulder pad that hides a stabiliser strap that'll keep your bag secure on your back when the action gets tough on two feet or on two wheels. A strong top grab handle and a useful velcro strap that attaches your Freerunner to your cabin luggage's retractable handle complete this most versatile bag.

Available in 3 sizes, Freerunner EX covers all the options

Adjustable cross body shoulder strap and stabiliser

Shoulder Strap removable.

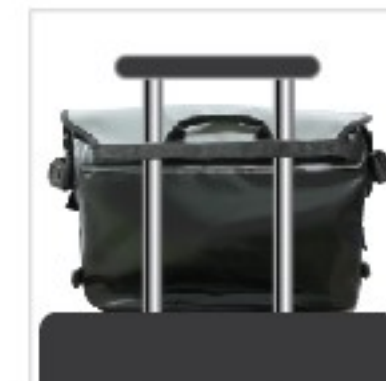

Mesh multi-pocket and key ring holder
