## BOAT MASTER

Boatmaster is an organic quick cleaner for varnished and unvarnished surfaces, a strong alkaline degreaser for the cleaning of floors, machines, applicable on all types of hardwood-, metal and plastic surfaces. Applicable on the hull, machinery, ribs, plastic, polyester. Does not leave residue and is antistatic and gives good grip on decks, floors and side deck which in turn ensures safety. Do not use on mirrors, glass and stainless steel. Use our InteriorMaster instead. For the best cleaning results, apply Boatmaster atomized on the surface to be cleaned and let it sit for at least 10 minutes. Brush in using a sponge or synthetic brush and then rinse with plenty of water. Through post-treatment with water, the product leaves no residue and remains antistatic. Boat Master does not attack anodized aluminum. Rinse thoroughly with water.

## Directions for use & recommended dosage

### Boat Master

Do not use on mirrors, glass and stainless steel. Use our InteriorMaster instead. For the best cleaning results, apply Boatmaster atomized on the surface to be cleaned and let it sit for at least 10 minutes. Brush in using a sponge or synthetic brush and then rinse with plenty of water. Through post-treatment with water, the product leaves no residue and remains antistatic. Recommended dosage: Normal contamination : 1:20, heavy contamination : 1:10, extreme contamination : 1:1 Note: Always rinse thoroughly with water in all cases. Test the surface to be cleaned by applying it to an area that is out of sight.

### Deck Master

Do not use on mirrors, glass and stainless steel. Removes Diesel oil, rubber stripes, old wax layers, sunscreen stains, fat, moss, alga, coaldust, soot. Applicable by mopping in, spraying and rubbing with a scouring sponge or hard brush. Allow this plus minus 10 minutes to reach the correct result. Stimulate by going over it again with the brush. Rinse with plenty of water. Recommended dosage; Normal contamination : 1:20; Heavy contamination : 1:10; Extreme contamination : 1:1. Note: Test the surface to be cleaned by testing it on an out of sight area. Keep frost-free. After rinsing thoroughly with water, drying and allowing to evaporate, the surface can be sealed. Pay attention! at the water holes and/or drains, rinse well with water because of the product's effect on wax layers. It continues to work.

### Interieur Master

Spray InterieurMaster on the stain for a few seconds from a distance of approximately 20 cm. Brush in if desired, then dab dry with a dry cloth. Repeat this treatment until the stain has disappeared. Dosage: use undiluted. Note: Test the surface to be cleaned for color. Cannot be used on Silk, Velvet & Suede

### Sanitair Master

For hygienic descaling and degreasing, leaves a pleasant scent. Sanitair Master is a fast-acting cleaner that effortlessly removes limescale, skin grease, rust, soap residues, copper green & black deposits on aluminum and all non-calcareous surfaces. For regular maintenance of wet areas such as sinks, showers, walls and toilet areas, swimming pools, sinks, stainless steel, rubber, plastic, acid-resistant tiles and tiles. For the best cleaning result Dilute Sanitary Master with lukewarm water. Use a higher dosage when removing lime residues. At a higher dose, clean well with a cloth or sponge and rinse thoroughly with water. Dosage: 1; 10. Note: Test the surface to be cleaned by testing for an out of sight area. Store free from frost.

### Bright Master

For a streak-free result, spray BrightMaster and wipe with a lint-free (microfiber) cloth. Dosage: use undiluted, spray the surface to be cleaned. Note: test the surface to be cleaned by testing it on an eye-catching area. Do not use cloths that have been washed with a fabric softener. Do not use a kitchen roll. Shake before use! Store free from frost.

## Hull Master

Applicable to outboard engines and waterline. Let the HullMaster work for 10 minutes, worked up with a scouring pad. Then rinse well with water. Repeat this operation if necessary. Aftertreatment with Boatmaster, rinse with plenty of water. Dosage: HullMaster is generally always diluted with water in a ratio of 1; 20.

In the event of an extreme contamination it is applied undiluted. For descaling and rusting, 1; 5 applied to the parts to be cleaned, soaked in an immersion bath. In cold or hot water. The HullMaster can be used for a faster result up to a temperature of 65 °C. Note: this product can damage parts that are galvanized.

Test the surface to be cleaned by testing an out of sight area.

Use chemical-resistant gloves and a mask.

## Support Master

Good to use for daily maintenance after intensive cleaning with the DeckMaster and BoatMaster and suitable for cleaning maintenance where high demands are placed on the cleaning result. For the best cleaning results on floors and side decks, we recommend using a flat mop and a microfiber cloth on other surfaces. SupportMaster can be diluted with hot or cold water. thoroughly rinse the cleaned surface with water. Recommended dosage: Normal contamination : 35ml; 10 liters of water, heavy contamination : 50 ml; 10 liters of water. Note: Test the surface to be cleaned by testing for an out of sight area. Store free from frost. Leaves no residue and streaks.

Warning: Keep out of reach of children.
